

Dear Diabetes Education Centre,

Mrs. C is currently being seen at our Heart Failure Clinic for management of heart failure secondary to a severe MI in 1994. She was diagnosed with Type II diabetes mellitus in 1993 and has been fairly well controlled on a single oral agent until recently.

She is currently taking the following medications:

---

---

---

---

---

She is being referred for evaluation of highly fluctuating blood glucose levels. Please find a record of her current blood glucose levels and the accompanying medication adjustment sheets.

Yours truly,

Director, Heart Failure Clinic
